Players can learn to adapt their game to the nuanced nuances of the technology, and make use of its depth and rhythm to excel at breaking players down with pace and precision and make a variety of tactical decisions. During the development cycle, content designers fine-tuned the features and game balance in close collaboration with the lead gameplay developers and enabled gameplay innovations – such as removing the need for players to perform a second aggressive tackle to win a penalty kick. The simulation also features reactive player animations, which can allow players to react to the ball in truly emergent ways. All FIFA titles are produced using Frostbite, the award-winning game development engine from DICE (formerly of Electronic Arts) that provides a high-fidelity experience. Innovation is at the heart of FIFA. This year, we continue our commitment to innovation and growth in the intelligent sports franchise. We're looking forward to revealing FIFA 22 at E3 2015. A West Texas couple were arrested after they allegedly made threats on social media against a local sheriff, according to the Sherman County Sheriff's Office. Deputies said 24-year-old Brittany L. Buchanan and 30-year-old Andrew R. Buchan were in custody after allegedly being belligerent on social media. The couple was placed in the county jail and charged with harassment of a public servant. Sheriff William Hix said the couple did not present a threat to the community and did not pose a danger to the public. "We certainly understand the dangers of social media, social media, and the intended message can certainly cause harm, causing harm to another person. So we certainly would not want to try and excuse or justify that," he said. Hix said sheriff's deputies were not alerted to any threats made by the couple until being contacted by the Sherman County Social Services Office. The couple and their mother reported they had been under a lot of stress recently over their son's declining mental health, which led to the social media hostility, he said. "I think social media, like anything, can be a double-edged sword, and it's incumbent that anybody who is in law enforcement understands that those messages that are left can sometimes reflect on us," Hix said. His office recently placed the social media accounts of several sheriff's deputies and other county employees
